

Broadway Streetcar Extension

ENVIRONMENTAL REVIEW

What is Being Analyzed?

▶ **Seattle Department of Transportation** is analyzing the environmental impacts of constructing and operating the Broadway Streetcar Extension. As part of the review the potential environmental impacts of the streetcar line and stations will be evaluated.

If any elements of the environment are determined to be significantly impacted by the Broadway Streetcar Extension, possible mitigation measures will be proposed.

- Elements of the environment SDOT will analyze during environmental review:**
- Air
 - Energy and Natural Resources
 - Environmental Health
 - Noise
 - Land Use
 - Housing
 - Aesthetics
 - Light and Glare
 - Historic and Cultural Resources
 - Transportation
 - Utilities
 - Noise and Vibration
 - Earth
 - Public Services
 - Parking
 - Environmental Justice
 - Construction
